

Supply chain management & ERP

En bref

- > **Langues d'enseignement:** Anglais
- > **Forme d'enseignement :** Travaux dirigés
- > **Ouvert aux étudiants en échange:** Oui

Présentation

Objectifs

This module aims to enable the student to :

- * understand the cross-functional integration in a supply chain, the strategy, the planning, the operation and the extension of logistics.
- * identify and describe the processes and the objectives of a Quality Management system as well as participate in its construction and improve the processes.
- * carry out an analysis of the existing situation regarding the safety and environmental aspects.

Heures d'enseignement

Supply chain management - TD

Travaux Dirigés

20h

Plan du cours

- * General facts and concepts about SCM
- * Introduction to flow management and issues (Lean & MRPII)
- * Modeling and understanding the Supply Chain (SCOR model, KPI, maturity of SC and organization)
- * Procurement (strategy & supplier selection)
- * Practical solutions (EDI/VMI/Multipick/MultiDrop/Cross docking/Functionnal Spinoff)

Compétences visées

L01 : Make the personnel aware and accompany them in activities linked to quality (approach, processes, procedures, tools...).

L02 : Know how to map a process.

L03 : Use continuous improvement methods.

L04 : Analyze the company's quality management system (current state, approach and deployment, possible improvements and future objectives).

L05 : Understand and carry out a basic analysis of the flows in a company.

L06 : Be able to establish the criteria necessary for a procurement strategy.
