

# DU International industrial and business management

Niveau de  
diplôme  
BAC +3

Durée  
1 semestre

Langues  
d'enseignement  
Anglais

## Présentation

The International and Business Management (IIBM) semester is aimed at students in the final year of their Bachelor degree and is only available in the autumn semester (semester 5 : end of August to the end of December). All of the subjects are entirely taught in English.

In today's competitive job market, graduates are required not only to be skilled within their specific field, but also to have a variety of other skills and knowledge which will enable them to work with others in a professional environment

## Objectifs

This semester addresses these issues by looking in depth at topics such as "Team management" and "interpersonal skills" through the lens of multiple forms of intelligence. Key functions within a company, such as "Corporate social responsibility", "Quality management" and "Supply chain" are also studied.

The link with local companies is also important, so students participate in company visits, observe management processes first-hand and do group projects on contemporary topics. In addition to developing rounded professionals, a special emphasis is placed on innovation and how to manage it.
