Présentation

The Outdoor Softgoods Design & Development Bachelor's Degree is a one-year international programme designed for both French and international students who have completed two years of higher education and wish to specialise as product developers in the sports industry.

During the Autumn semester (S5), students will study at IUT Anancy, gaining in-depth knowledge and hands-on experience. In the Spring semester (S6), they will complete a 4-to-6-month internship within a company, applying their skills in a realworld professional environment.

All courses are taught entirely in English, and classes bring together both French and international students, fostering a rich intercultural experience and a global perspective on the industry.

Objectifs

This programme aims to equip future technicians with the essential skills in developing and managing clothing, bags, and textile accessories, ensuring their success in the highly competitive outdoor sports industry.

The sports industry is constantly evolving and in need of young professionals-future product managers capable of developing innovative strategies to meet customer needs. Their role is essential in optimising both products and their communication for better market performance.

Students in this Bachelor's programme will learn how to create effective roadmaps, analyse and anticipate market trends, and facilitate seamless collaboration between key stakeholders, including engineers, marketers, designers, and executives.

Organisation

Date de début de la formation : September

Date de fin de la formation : September

Stage (hors formation en alternance)

The 4 month internship (mostly in english) takes place in an outdoor sports industry company in France or abroad.

Modalités des projets tutorés

Each student participates in a group project involving work on a specific issue provided by outdoor sports industry stakeholders

Admission

A qui s'adresse la formation ?

- Minimum 2 years of higher education studies (120 ECTS)
- Creative, enterprising and interested in good interpersonal skills
- Individuals with official recognition of previous professional acquired skills may also apply
